NSN# : 6920-01-5925661

Inert Replica Iraqi 107mm Rocket (Deluxe, 100% Metal)
Item# : OTA-2978M

Description :

This training aid is an excellent example of our capabilities. We manufacture these new from raw materials. This replica 107mm rocket is 100% machined metal and can be disassembled and assembled just like the real thing. The inert replica fuze removes and further disassembles. Solid steel warhead removes, as well as the Rocket motor collar sections, and the rear venturis are present. This is an excellent and safe classroom training display as this was never at any time a real or "live" rocket.

TYPICAL DYNAMITE EXAMPLES

The image displays a variety of commercial dynamite products. At the top, the word "DYNAMITE" is printed in large, bold letters. Below it, several sticks of dynamite are shown, each with its own branding and safety markings. The brands include "DYNAMITE", "BLASTING", "FRACTO-EX", "NITRO TRENCHER", and "SAK PAK". The sticks are arranged in rows, with some showing the full length and others showing close-ups of the labels. The labels often feature the word "DANGER" and other safety warnings. The dynamite sticks are typically cylindrical and wrapped in a paper or plastic covering. The colors of the labels vary, including yellow, red, and white. Some sticks have a black label with white text, while others have a white label with black text. The sticks are shown in various orientations, some horizontally and some vertically. The background is a plain, light-colored surface.
